## Key Digital Announces Compass Control Pro Partner Alliance with Biamp Nexia

**MOUNT VERNON, NY – October 20, 2017** Key Digital, an award winning (CES, CEDIA, InfoComm, NAHB) developer and manufacturer of leading-edge technology for HDTV applications, has announced that Biamp Nexia Digital Signal Processors are now compatible with the Compass Control System, the first fully integrated major control system built from the ground up to use Apple's iOS devices – iPad®, iPad mini®, iPhone®, and iPod touch® – as its backbone.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with Biamp Nexia Digital Signal Processors. These products and profiles are rigorously tested by Key Digital. The Biamp Nexia driver will allow for IP control, mixing and routing channels, and audio controls.

Compass Control® users will be able to use their Biamp Nexia Digital Signal Processors with their Compass Control® app. If you demand high quality distance-conferencing or need to distribute audio throughout a few rooms, there's no smarter choice than Nexia. More than a great value, Nexia is a robust system, with high fidelity sound and industry-leading software. It operates on regular Ethernet cabling using NexLink, a protocol created by Biamp to maximize clarity and speed over short distances. While Nexia is intended for smaller installations, know that several Nexia units can be connected if expansion is required

*“Resulting from cooperative efforts between Key Digital and Biamp Nexia, the integration of its Digital Signal Processors within the Compass Control environment represents a powerful and user-friendly comprehensive solution delivering iOS-based control and entertainment functionality,” stated Key Digital’s COO, Michael Lakhter. “The Compass Alliance Partners have come together to create a system that has full driver integration already completed, increasing efficiency for integrators,” Lakhter concluded.*

## About Key Digital®

Led by the “Father of DVD”, Mike Tsinberg, Key Digital® is an InfoComm, CEDIA, CES, and NAHB award winning manufacturer of professional distributed video and control system equipment.

Since 1999, Key Digital has lead the constantly evolving A/V industry by designing products that deliver industry leading quality, performance, and reliability to corporate, bar & restaurant, digital signage, education, government, and house of worship applications.

Key Digital products are designed and engineered in-house in Mount Vernon, NY. Superior quality, ease-of-installation, and versatility are the result of strenuous research, development, and testing. Expertise and unparalleled knowledge have created a unique hardware-software suite solution ideal for the consultants, designers, and installation firms of the A/V industry. Key Digital® is known to deliver best-in-class products based on quality, performance, and reliability.
