Key Digital Announces Compass Control Pro Partner Alliance with Honeywell's VISTA Security Panels

MOUNT VERNON, NY – December 15, 2017– Key Digital, an award winning developer and manufacturer of leading-edge technology for HDTV applications, has announced that Honeywell's VISTA panels are now compatible with the Compass Control System.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with VISTA® via the 4232CBM connected building module. These products and profiles are rigorously tested in Key Digital and accepted by Honeywell for interoperability. They allow for audio, video, home control and energy management to react based on different security system states (Arm/Away, Arm/Stay, Disarm, Intrusion and Fire/Emergency).

The high capacity, feature-rich VISTA panels lets you deliver more value to your customers on each and every sale with up to 48 zones of protection; Internet uploading/downloading, graphic keypad support and dual partitions. VISTA panels give you the ability to send alarm signals and upload/download via an Internet Protocol (IP), improving the speed at which information can be delivered to and from the control panel.

Key Digital's pre-configured driver will provide audio, video, climate, lighting, home control, keypad emulation, security and energy management and basic system status for most residential and commercial Honeywell VISTA panels. This provides configuration with systems previously not supported through direct control, allowing dealers to incorporate security to installations using their current VISTA panels.

Key Digital is an award winning developer and manufacturer of leading-edge digital video processing and video signal distribution solutions as well as the first fully integrated control system built from the ground up to use iOS and Android, Compass Control Pro. Compass Control Pro offers modular programming or custom design with a blank slate that is limited only by imagination. Compass Control Pro Partner Alliances pre-configured control drivers, modules, and GUI templates integrate instantly and seamlessly to save on precious programming time.

“Resulting from cooperative efforts between Key Digital and Honeywell’s, the integration of its Model VISTA Security Panels within the Compass Control environment represents a powerful and user-friendly comprehensive solution delivering iOS-based control and entertainment functionality,” stated Key Digital’s COO, Michael Lakhter. “The Compass Alliance Partners have come together to create a system that has full driver integration already completed, increasing efficiency for integrators,” Lakhter concluded.

About Key Digital®

Led by the “Father of DVD”, Mike Tsinberg, Key Digital® is an InfoComm, CEDIA, CES, and NAHB award winning manufacturer of professional distributed video and control system equipment.

Since 1999, Key Digital has lead the constantly evolving A/V industry by designing products that deliver industry leading quality, performance, and reliability to corporate, bar & restaurant, digital signage, education, government, and house of worship applications.

Key Digital products are designed and engineered in-house in Mount Vernon, NY. Superior quality, ease-of-installation, and versatility are the result of strenuous research, development, and testing. Expertise and unparalleled knowledge have created a unique hardware-software suite solution ideal for the consultants, designers, and installation firms of the A/V industry. Key Digital® is known to deliver best-in-class products based on quality, performance, and reliability.
