BIAMP® Nexia® Module Now Available on the Compass Control®

COMPASS CONTROL®
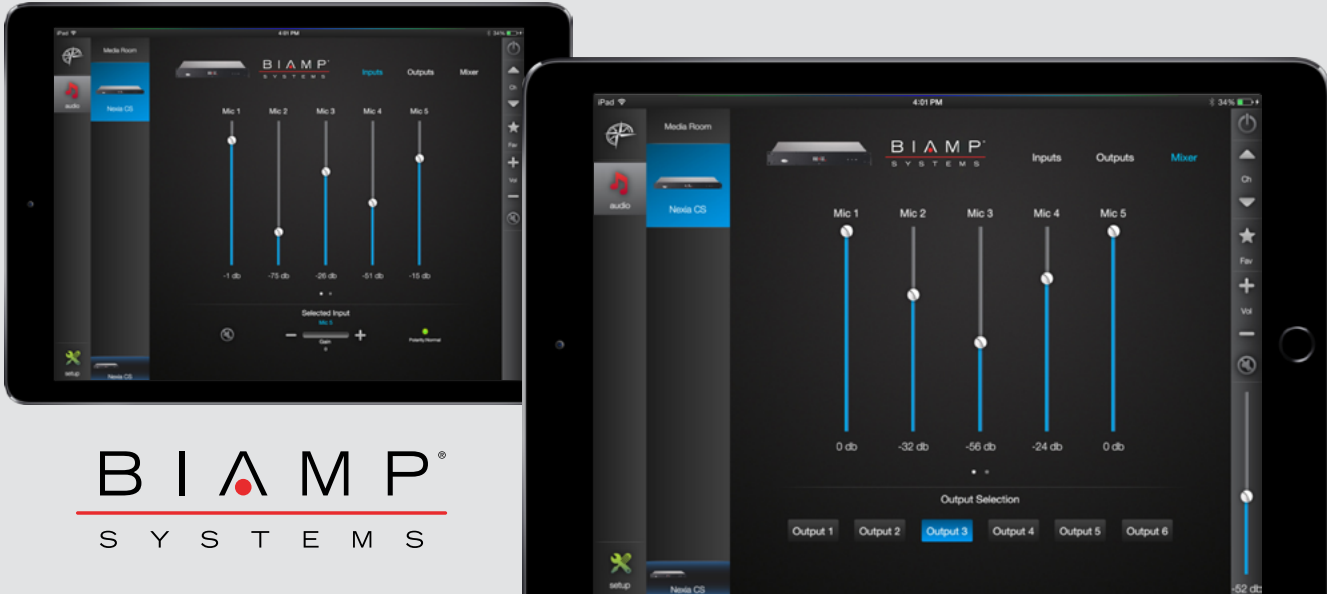

BIAMP®
SYSTEMS

BIAMP® Nexia® Digital Signal Processors are now compatible with the Compass Control® System, the first fully integrated major control system built from the ground up to use iOS & Android devices – as its backbone.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with all BIAMP® Nexia Digital Signal Processors. Compass Control® users will have access to Nexia conferencing audio solutions through their Compass Control® app. The module will provide access to IP control, mixing and routing channels, and audio controls, while having access to a fully integrated control system with additional video, lighting, climate, shades, and automation controls.

Module Features:

› Full Bi-Directional Driver over RS control
› Dimmer/Switch Control for Lighting
› Z-wave Lighting
