

Discover The Possibilities™

Denon AVR

Module Setup

About:

Denon provides a large selection of Audio/Video Receivers that can complement any room or home theater.

Setup Communication:

Denon AVRs are equipped with network capabilities (Not all models). These AVRs are controlled over TCP/IP on port 23.

Setup in Compass Navigator:

One module is required per Denon AVR. In Zone Construction, please add the Denon module and place it in an Audio Zone. Once placed, head over to Controlling Flow and place the Denon module in the System Designer.

Setup Complete:

Upload and update project for use.

Control:

Compass Control offers

- AVR Controls
 - OSD Control
 - Playback Control
 - Source Control
 - Audio Mode Control
 - Volume Control
 - Tuner Control
