

# Digital Watchdog Module Now Available on the Compass Control®

Digital Watchdog IP Cameras are now compatible with the Compass Control® System, the first fully integrated major control system built from the ground up to use iOS & Android devices – as its backbone.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with all Digital Watchdog IP cameras. Compass Control® users will have access to complete video surveillance IP cameras through their Compass Control® app. The module will provide iOS or Android devices with access to live camera streams, audio, and playback controls, while having access to a fully integrated control system with additional video, lighting, climate, shades, and automation controls.

## Module Features:

- › Live stream from all DW IP Cameras
- › Playback control
- › Audio available depending on device model
