Global Cache iTach Controller Setup

About:

Global Cache offers a wide variety of products that easily integrate into Compass for extra control. From IR to Serial, and even contact closures, Global Cache provides extra reliable control for any Compass System.

Setup in Compass Navigator:

Global Cache is integrated into Compass Navigator as a Master Control. Go to the Setup Controllers Tab and under “Master Controllers”, click on the dropdown to display the controller types that may be used.

Add the desired Global Cache device and insert the IP Address. Treat it as a normal Key Digital Master Controller. Drag and drop devices into it in Controlling Flow and control will be automatically set when the project is saved and uploaded.

Setup Complete:

Upload and update project for use.

Control:
