# Key Digital: Switchers

## Module Setup

### **About:**

Key Digital® Champion Series™ HDMI Matrix Switchers are designed and engineered to offer the best in quality, performance, and reliability, while providing cost effective HDMI matrix solutions.

### **Setup Communication:**

Key Digital switchers are mainly controlled by RS232.

### **Setup in Compass Navigator:**

Each module contains inputs and outputs that can be customized. In Zone Construction, please drag and drop the sources, accordingly as they are found on the back of the switcher, to the inputs of the KD HD switch device tree.

Properly setting up the Zone Construction will allow for auto-switching when choosing a device in a modular project.

### **Setup Complete:**

Upload and update project for use.

### **Control:**

Compass Control offers

- Bi-Directional Control  
HDMI Matrix Switching
- Addressing for multiple or daisy-chained switches
