

Kwikset® Electronic Locks Module Available on the Compass Control®

Kwikset

Kwikset® Electronic Locks are now compatible with the Compass Control® System, the first fully integrated major control system built from the ground up to use iOS & Android devices – as its backbone.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with Kwikset® Electronic Locks. Compass Control® users will be able to access controls for their Kwikset Electronic Locks with their Compass Control® app. The module will provide iOS/Android access to RS control, lock/unlock door controls, and status of door locks, while having access to a fully integrated control system with additional video, lighting, climate, security, and automation controls.

Module Features:

- › Bi-Directional Control over RS-232
- › Lock/Unlock Door Controls
- › Lock/Unlock Door Lock Status available
