FOR IMMEDIATE RELEASE[Lutron](#)

Key Digital Announces Compass Control Pro Partner Alliance with Lutron RadioRA 2 Whole Home System

MOUNT VERNON, NY – January 24, 2018– Key Digital, an award winning developer and manufacturer of leading-edge technology for HDTV applications, has announced that Lutron RadioRA 2 Whole Home System is now compatible with the Compass Control System, the first fully integrated major control system built from the ground up.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with Lutron RadioRA 2 Whole Home System. These products and profiles are rigorously tested by Key Digital. The Lutron RadioRA 2 Whole Home System driver will allow for IP control, compatible with all Radio RA 2 equipment (Shades, HVAC, Dimers, Switches, Fan, and more). Provides an easy integration into Compass Control with XML file import.

Compass Control® users will be able to use their Lutron Radio RA2 Whole Home System with their Compass Control® app. The Lutron RadioRA 2 is a wireless total home control system. This energy-saving system gives you the ability to adjust the amount of daylight and electric light (using light controls and automated shades) as well as temperature in a single room or throughout your whole home. The system also turns off standby power to small appliances when they're not in use.

“Resulting from cooperative efforts between Key Digital and Lutron, the integration of its Model Lutron RadioRA 2 Whole Home System represents a powerful and user-friendly comprehensive solution delivering iOS-based control and entertainment functionality,” stated Key Digital’s COO, Michael Lakhter. “The Compass Alliance Partners have come together to create a system that has full driver integration already completed, increasing efficiency for integrators,” Lakhter concluded.

About Key Digital®

Led by the “Father of DVD”, Mike Tsinberg, Key Digital® is an InfoComm, CEDIA, CES, and NAHB award winning manufacturer of professional distributed video and control system equipment.

Since 1999, Key Digital has lead the constantly evolving A/V industry by designing products that deliver industry leading quality, performance, and reliability to corporate, bar & restaurant, digital signage, education, government, and house of worship applications.

Key Digital products are designed and engineered in-house in Mount Vernon, NY. Superior quality, ease-of-installation, and versatility are the result of strenuous research, development, and testing. Expertise and unparalleled knowledge have created a unique hardware-software suite solution ideal for the consultants,

designers, and installation firms of the A/V industry. Key Digital[®] is known to deliver best-in-class products based on quality, performance, and reliability.
