

MechoShade Systems Module Available on the Compass Control®

Kaleidescape M-Class products are now compatible with the Compass Control® System, the first fully integrated major control system built from the ground up to use iOS & Android devices – as its backbone.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with MechoShade Shade Systems. Compass Control® module enables seamless integration of MechoShade Shade Systems in the Compass Control environment while greatly reducing the installation time for integrators. Module provides system users with full shade operation functions, while having access to a fully integrated control system with additional video, audio, lighting, climate, and security controls.

Module Features:

- › Bi-Directional Control of Single Motor Devices via RS-232
- › Full control of Open, Close, Track, Stop, and Presets
- › Group Control also available
- › Driver and Module Available
