## Key Digital Announces Compass Control Pro

### Partner Alliance with Panamax Uninterruptible Power Supplies

**MOUNT VERNON, NY – January 29, 2018**—Key Digital, an award winning developer and manufacturer of leading-edge technology for HDTV applications, has announced that Panamax Uninterruptible Power Supplies are now compatible with the Compass Control System, the first fully integrated major control system built from the ground up.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with Panamax Uninterruptible Power Supplies. These products and profiles are rigorously tested by Key Digital. The Panamax Uninterruptible Power Supplies driver will allow for RS232 control, outlet control, and power management (view watts, voltage, and warnings).

Compass Control® users will be able to use their Panamax Uninterruptible Power Supplies with their Compass Control® app. Panamax's new family of UPS products are designed and engineered specifically for today's sophisticated home theater systems. Combining several features and technologies, this product family delivers the ultimate power solution whether the problems include typical power fluctuations and temporary power outages, to dangerous overvoltages or a total system blackout. Panamax UPS products offer solutions to prevent processors and hard drives from losing data and configurations.

*“Resulting from cooperative efforts between Key Digital and Panamax, the integration of Panamax Uninterruptible Power Supplies represents a powerful and user-friendly comprehensive solution delivering iOS-based control and entertainment functionality,” stated Key Digital’s Vice-President of Sales, Michael Lakhter. “The Compass Alliance™ Partners have come together to create a system that has full driver integration already completed, increasing efficiency for integrators,” Lakhter concluded.*

#### About Key Digital®

Led by the “Father of DVD”, Mike Tsinberg, Key Digital® is an InfoComm, CEDIA, CES, and NAHB award winning manufacturer of professional distributed video and control system equipment.

Since 1999, Key Digital has lead the constantly evolving A/V industry by designing products that deliver industry leading quality, performance, and reliability to corporate, bar & restaurant, digital signage, education, government, and house of worship applications.

Key Digital products are designed and engineered in-house in Mount Vernon, NY. Superior quality, ease-of-installation, and versatility are the result of strenuous research, development, and testing. Expertise and unparalleled knowledge have created a unique hardware-software suite solution ideal for the consultants,

designers, and installation firms of the A/V industry. Key Digital<sup>®</sup> is known to deliver best-in-class products based on quality, performance, and reliability.
