

Discover The Possibilities™

Phoenix Audio Octopus Module Setup

About:

The Octopus is an Audio Conferencing Mixer that gives you crystal clear audio. Using the Octopus allows you the freedom to mount microphones and speakers anywhere in the room (ceiling, walls, and table tops) for professional sound and a sleek look. The Octopus has a high powered DSP and technology that automatically monitors and mixes the audio. Together with Compass Control, audio controls are attractive and easy to use.

Setup Communication:

The Octopus is controlled over RS-232. Please add the RS-232 module into the project.

Setup in Compass Navigator:

Drag and drop the module into the desired audio zone. Doing so will give the user a simple interface to control the Octopus.

Setup Complete:

Upload and update project for use.

Control:

Compass Control offers

- Bi-Directional 2-Way Feedback
- Speaker Volume
- Speaker Mute
- Microphone Volume
- Microphone Mute
