

Vantage™ Controls InFusion Module Available on the Compass Control®

VANTAGE

Vantage™ Controls InFusion 36V Controller now compatible with the Compass Control® System, the first fully integrated major control system built from the ground up to use iOS & Android devices – as its backbone.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with Vantage Controls InFusion 36V Controller. Compass Control® users will be able to access controls for their InFusion 36V Controller with their Compass Control® app. The module will provide access to control of lighting/loads as well as motors, thermostats and IP control, while having access to a fully integrated control system with additional video, audio, security, and automation controls.

Module Features:

- › Bi-Directional Driver Available for Vantage InFusion Systems
- › Control of Lighting/Loads as well as motors and thermostats
- › Wireless control over TCP/IP
