

Aprilaire Wifi Thermostat

Module Setup

About:

The Aprilaire Wifi Thermostat series units are electronic, programmable Wi-Fi-enabled thermostats that can be controlled from anywhere in the home.

Setup Communication:

Aprilaire Wifi Thermostat is controlled over IP on Port 8000. In Compass Navigator, please insert IP Address under Device Properties. Please note that each Wifi Thermostat requires its own module per partition if other units are controlling separate systems.

Setup Complete:

Upload and update project for use.

***Supported Models*:**

8820, 8830, 8840

Control:

Compass Control offers

- Aprilaire Wifi Thermostat Controls
 - Thermostat Mode
 - Thermostat Set Points
 - Thermostat Fan Mode
 - Thermostat Eco Savings
 - Thermostat Sensors
